Ongoing O&M & Performance Monitoring																		

- NOTES 1. Schedule is projected based on information provided by NW Natural and subject to change as new information becomes available.
2. Siltronic EIB groundwater SCM fully implemented in July 2009. Performance monitoring is ongoing.
3. RI/FS of MGP contamination on the Siltronic and US Moorings properties are in the early phases and are not shown.
4. Siltronic cVOC RI/BRA submitted, but overall RI/FS dependent on completion of MGP site investigations being conducted by NW Natural.
5. Source Control project extends approximately 600 feet onto the Siltronic Corporation along the shoreline.
6. O&M & Post Implementation Monitoring period will extend beyond 2013.
7. Figure is intended to indicate the timeframe during which work will be conducted and should be read as follows.
- 1 bar = work will be done within 3 months
 - 2 bars = work will be conducted within 3-6 months
 - 3 bars = work will be conducted within 6-9 months
 - 4 bars = work will be conducted within 9-12 months

Prepared August 2009
